I have enjoyed working with Michael, Daniel and their team at Detector Electroics Corp. They have done a fine job representing the Detector Pro line since it was first introduced in 1996. One of the things I see them do is go the extra mile for their customers. It is always nice to see a family run business endure and we wish them many years of continued success. We appreciate the partnership from Michael and Daniel at MetalDetector.com. As a family owned business, we choose our partners carefully. We have found that their team has done a fine job of representing our line. With thirty years of success under their belt, we expect that they will be a partner for many years to come. We at Treasure

Products, manufacturer of the VibraProbe and VibraTector, want to congratulate Daniel and Michael on the admirable milestone of being in business for over three decades. The dedication and product knowledge that your staff exhibits has been a great benefit to us. We offer our best wishes for your continued success. I have found that the team at MetalDetector.com has done a fine of job representing the entire JW Fishers line. They have partnered with us in helping to bring our products to both individuals, larger corporate and governmental organizations. Michael and Daniel have established a knowledgeable team that has done the job of getting the correct product in to the hands of each

consumer. <http://www.lapalombella.org/palombella/aziende/corinex-av200-cablelan-adapter-manual.xml>

I wish them continued success as they represent our products in the years to come. I have been impressed by the professional approach and the experience of Daniel, Michael and the entire team at Detector Electronics Corp. Three decades of superior customer care has been the key to their success and large sales volume. We have enjoyed working with Michael, Daniel and their esteemed team at Detector Electronics Corp. We feel that they have been the best choice for representing the good reputation of the Makro Detectors in the region. They have been working towards 100% customer satisfaction ever since they started their cooperation with us as our exclusive Distributor in the USA and Canada. We are pleased to see both their business and the sales in their region continue to grow. It is nice to see both our family business and theirs growing together. We see our companies moving forward together for many years to come. Garrett has a longstanding quality relationship with Detector Electronics Corp since the 1980s. I have seen them grow from a regional dealer to one of the largest internet dealers yet they have maintained that special care for the customer for over three decades. Their team of knowledgeable, helpful and friendly staff and family make their dealership a first choice for the treasure hunter. MetalDetector.com has been a valuable business partner to Fisher Research Labs for many years. They continue to grow while still offering the best in customer service and after sale support, which is very important to FRL. We wish to congratulate them on 3 decades of business and stellar service to our mutual customers. Their entire staffs knowledge of our product helps to ensure the customer gets the right detector for their needs regardless of what they might be. We look forward to our future relationship and continued success of MetalDetector.com and their entire staff. I recently had the pleasure of meeting with the team at MetalDetector.

com at their newly expanded facility in Southborough, MA. I have to say that I was impressed with their operation and knowledge of the Teknetics product line. When the Teknetics product line was recently relaunched, MetalDetector.com was one of the first partners we contacted. They have had a long standing relationship with the brand as one of the original Teknetics dealers in the country. We value long standing relationships and are excited to have them as a member of our team. Its been an honor and privilege working with the fine folks at Detector Electronics for over 25 years. Its no surprise that Sondra and Davids fine sons, Michael and Daniel have continued in their parents tradition of being exemplary businesspeople who take the time and care enough to really know their clientele. Its always been a pleasure working with you. DRS Electronics, GmbH is proud to have Detector Electronics Corp. I have known Michael and Daniel for over a decade. Their team is genuine and knowledgeable. They provide exceptional support and service to our customers. They are a recognized leader in the industry. Internationally their business is known for excellent customer support. Their presence is a great confidence for treasure hunters. MetalDetector.com has been a great business partner for many years and the best choice for representing Makro Detectors in the USA. With the addition of Nokta products to their product portfolio in 2018, we are confident that our businesses will continue to grow together for many years to come. Gary Micheau CEO Whites Electronics Gary Storm Owner Detectorpro Ingrid Hawk Partner Lesche Products Michael Bernstein Owner Treasure Products, Inc. By the end I felt I was dealing with a friend rather than a faceless

company on the net. Well done! And, by the way, my 7 year old son Juanito found a nickel yesterday when he took his detector out for the first time. If things keep going this way the detector will have paid for itself within a few short decades.

But seriously, he is really enjoying it and hoping to find his longdreamedof buried treasure some day. Happy to do business with you, Hello Dan, Remember me. I bought my Tesoro Tiger Shark from you. It came just when you said it would, and works just as you told me it would. Thanks for your help in sorting through the maze of detectors. Dear Sondra, 1160 GRAM Meteorite. Dont ask where. One of many! As far as being excited I all most had a stroke. Heres a photo of one Meteorite I found on the surface, over 800 grams and a 447 gram one. The one in the middle is my first. The bar magnet has some small Iron meteorites on it. Dear Detector Electronics, I received the Tesoro Sand Shark today.and want to thank you. Tried it, love it, looking forward to many enjoyable hours with it. Thanks again. Dear Customer Service, Just wanted to thank all involved in a recent shipment to me that was a gift for my grandkids. I ordered 2 detectors but for some reason only one was shipped. After calling your company you bent over backwards to get the second detector to me on time for giving to my grandchildren. I explained that we exchange gifts a week early so my children and their families can be in their homes Christmas morning since some travel distances are involved. The second detector arrived last Friday in time for our celebration last Saturday. THANKYOU. I order quite a few things online and have experienced some terrible companies but you are the best. Best regards and have a wonderful Holiday Season Hi Guys, I have just come in after spending an hour or at my local beach with my son, which is only a 5 minute walk from my home called Deception Bay. This is the first time i have ever used detector. The very first thing it detected in less than a minute was a two dollar coin, boy we were so excited. Not by the amount, but by the fact that on its maiden voyage it detected a coin. We then detected a ten cent piece.

<http://londiniumcentre.com/images/casio-1545-dw-manual.pdf>

We cant wait to take it to a popular beach and I will practice more with the settings. I would like to thank you for your prompt service. My detector arrived at my door In Brisbane Australia in less than a week. This is the first time I have used any service like this outside of Australia, but with this kind of service and ease of buying and your range of goods this will be the first of many transactions. I just wanted to say thank you to Scott who made my recent purchase so pleasant. I am enjoying my Tesoros and have found lots of cool stuff so far. Just waiting for that first gold find. Thanks again for all the help that was provided in making my decision. Hi Scott, I was amazed at how fast I received my BOUNTY HUNTER. The order arrived in perfect condition, and in only three days after I placed the on line order. The four part series about selecting the right product was also appreciated and helped me to make the right decision for my purchase. You are truly a company that takes care of business and most importantly your customers. It is a pleasure doing business with you and I will gladly recommend you to anyone that wants to buy a metal detector. Thanks for the GREAT SERVICE. Dear Customer Service, I am a very happy camper. Yesterday I took my Garrett Ace 250 out for the first time to some local parks. My total find was about 150 coins. The detector works so well and so easily. It only took me about a half an hour before I new what every button did. PS I plan on buying my next detector from you. Dear Sondra, I purchased an Ace 250 from your site for my 7 year old son and now I am hooked. This is our first metal detector and the Ace does every thing it says it will. Thanks for the fast delivery and introducing my son and I to a great new hobby. Coin shooting in Pensacola, Fl Sondra, I got the detectormy husband was thrilled. Thank you so much. You and Daniel have been so helpful. I am a first time buyer and am feeling very lucky to have found your website.

<http://www.loutrainers.com/images/casio-1500t-7v-manual.pdf>

Daniel helped me to locate a really great detector and you have been extremely courteous and prompt in seeing my order through. I look forward using my new metal detector. Hope you have a wonderful holiday season. Overall my experience ordering off of your website was convenient and customer service was great. Thanks again. Dear MetalDetector.com I just want to thank Sondra and the rest of the gang for my Minelab Explorer SE. It was a pleasure doing business with you and I will recommend your fine business to my other detecting buddies. Anita S. and Juan G., United Kingdom Mike T., Rockport, MA John B., San Diego, CA Dana, Mystic, CT Dick H. Steve M. Nick V., Churchville, PA Duane B., Springville, NY Bill B. David and Josh Lori G., Bessemer, AL Jason R, Massachusetts Our NoHaggle, BestPrice Guarantee on Metal Detectors The same low pricing for everyone. Whether you're a metaldetecting expert or novice, we keep it simple. We offer the lowest advertised pricing allowed by contract with each manufacturer. The personalized service you receive from our experienced team is our added bonus. That's what we are all about. Rest assured, you will not find a better value online. Visitor I received the parcel today. Dan Great! It came right to your home. This is our first metal detector and the Ace does everything it says it will. We Ship Direct To You Detector Electronics Corp. Michael and Daniel lead the MetalDetector.com team. Each day we set out to provide you with the best customer experience in the industry. Wherever you are in the world, product specialist Maria is here to help. Maria speaks fluent English and Spanish. Heather interfaces between our office and warehouse teams to help expedite orders to our customers around the world. Moe is not only one of our product specialists; he was also one of our first customers. He has been metal detecting since 1989. Dave keeps all of the great deals and products that you see on our website up to date.

When it comes to managing the warehouse to get the orders to our customers quickly and efficiently, Bob, Matt and Jake are our A team. Tom, Diana and Javier work closely with our customers to provide the highest level of customer care in the industry. Before shipments are accepted from vendors, our team closely inspects inbound orders for accuracy. As metal detectors and accessories are received, our team packages and labels each item. Large shipments arrive from vendors in bulk. They are stored in our newly constructed bulk goods warehouse. Inventory is transferred from the bulk goods warehouse to our main warehouse where orders are picked, packed and shipped to customers. As customer orders arrive in the main warehouse our team hand picks the items. The items picked are checked for accuracy throughout the process. Michael and Bob confer on an item as an order is pulled for a customer. Once picked, orders flow down the conveyor on their way to the packing station. As the order nears the final stages of the process, each order is over packed and then cushioned with recycled materials. Michael adjusting an early Garrett Metal Detector in North Carolina at the first treasure hunt we ever displayed our products at back in 1985. Sondra on the road again helping a customer learn about the hobby at a metal detector show. Daniel and Sondra, posing for a picture while on a family metal detecting vacation in the Caribbean. Sondra and Daniel at another one of the hundreds of treasure events that they attended in the early years across the United States. Michael and Daniel pose for a picture inside the Minelab headquarters in Adelaide Australia while attending a distributor meeting. Michael and Daniel attend Treasure Week in Seymour Indiana, one of the largest organized treasure hunts in the country. David, Michael and Daniel posing after a day of metal detecting at the beach. In the early years Sondra worked tirelessly and wore many hats.

Butch Videos for this product 111 Click to play video Bounty Hunter Land Ranger Pro Metal Detector Manufacturer Video Next page Upload your video Video Customer Review BEST METAL DETECTOR 2020 Top 10 See full review Revisione Onsite Associates Program Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Tex 4.0 out of 5 stars Take it from someone whos owned all three of the detectors I just mentioned, the Land Ranger Pro packs a lot of features for the price, but it will never truly compete with Garretts AT Pro or especially the AT Max. Having said that, I believe the Garrett AT Pro should be considered the baseline for what a good detector is. The LRP could probably detect deeper than what I've experienced, but turning the sensitivity above 8 causes the detector to give a LOT of false readings in my area. After chasing phantom tones with the LRP and digging enough dirt up to bury a car and finding nothing, I stopped running the sensitivity over 6 or 8, otherwise it's just plain annoying. The AT Pro and Max can be a bit chatty when sensitivity is turned all the way up, but theyre usually detecting something, not just going crazy over mineralized soil or big tree roots. Yes, my LRP loves tree roots. As much as detectorists hate them, like most detectors, the LRP enjoy chirping on pull tabs and bottle caps. These sound like the coins and rings you've been dreaming about digging up, but turn out to be trash when dug up. Now if you're one of those guys who digs every signal no matter what, then don't worry about what I just said and you probably don't use a Bounty hunter anyway.

Iron disc In light iron trash like a nail here and there, the LRP's iron disc does fairly good at discriminating, but in medium to heavy iron trash the LRP sounds like you've hit the jackpot due to the conductivity of all the iron. With no protons, the LRP can be hard to tell if you've found a coin or just a few nails. Once again, Garrett's iron disc grunts like a caveman and let's you know there's iron below no matter how conductive it is. Ive been very impressed with Garretts iron disc. So what do I not like about the Bounty Hunter LRP. One of my biggest complaints about the LRP is the bubble buttons. This may sound small, but its HUGE when youre actually in the field with the detector. The Precision Point PP button on the LRP simply is not reliable. This is a known issue, just Google it. Yes, theres mods you can do to fix it, like taking the unit apart and soldering a separate button for the PP, but Bounty Hunter should have this issue fixed by now. To summarize what the PP button issue is, the button no matter how you push it is intermittent which makes the Precision Point hard to use and almost worthless at times. There's a lot more I could review and talk about, but most everything has been covered many times by other reviewers. To summarize, the Bounty Land Ranger Pro is probably the best, cheap detector out there, but it falls short in almost every area when

compared to mid range detectors like the Garrett AT Pro. If this is your first detector, or you're upgrading from another Bounty Hunter, you're bound to be very impressed with the LRP. Keep this in mind, everything the Land Ranger Pro can do, the AT Pro can do better, and sometimes much better. You'll be glad you did. So why 4 stars after a critical review. Because even with its quirks, the Bounty Hunter Land Ranger Pro does what its advertised to do minus the annoying PP button at a price that won't break the bank. The long term members gave it their nod of approval and it is worthy of their respect.

That was the test for this product in my view. Recommended for people serious about the hobby. And yes it has a small owners manual contrary to what other reviewers stated. Could they have left it in the box. It was lightly taped to the inside wall. Bottom line it works great. Needs a learning curve to fully benefit. Patience is a virtue. The Pin Pointer button does not engage easily and solidly. You need to fool with the button to find the sweet spot where it will stay engaged. Same with the ground grab. This is my second Bounty Hunter Pro, the first one's PP button is now completely shot and the ground grab is on its way out too. I love the way this detector works and how the ground grab can be manually adjusted. Too bad they can't get the buttons right. So far it seems to be doing great. Very light weight and easy to use. I found a few objects but nothing with old coins just yet. The LRP seems to be an improvement over the other Bounty Hunters I have used 67 years back. But after I saw the Land Ranger Pro, my interest in MDing rekindled and so far, even though I haven't hit on any old coins, I'm not gonna abandon the hobby. I just need to get out and find, or get permissions in older places where relics may be located. I have a Whites Treasure Pro that I absolutely love and bought this as a backup and for the girlfriend but I swing this detector a lot!!! The recovery speed destroys the recovery speed of the Whites Treasure Pro. The coin mode is equivalent to the high trash mode on my Treasure Pro so when hunting parks this thing is a coin retrieving monster. It will beep here and there but it tells the operator absolutely when there's a good target. If the beep isn't repeatable and tight, it's garbage and move on. The VDI numbers on good targets are so tight they barely move. The target ID stays the same it moves maybe one number up or down.

My Treasure Pro can jump around five or more numbers on the scale either direction but repeat enough to confirm a good target, but the Bounty Hunter and another Fisher detector I own which is also by First Texas is just amazingly tight with lightning fast recovery speed. The photo is a couple hours spent at a supposedly hunted out park in an area I'd hunted myself including 2 wheat back pennies at about 5 inches. Did a bit of research and it's liked in the US, it has functions on it more expensive metal detectors have like Ground Grab etc. It's a First Texas machine who make Teknetics, Fisher as well as Bounty Hunter. From what I'm gathering it's the same machine as the Teknetics Liberator. Already found old buttons and my first coin which was 17th century. Can't compare to other machines but it seems a good machine with all its functions and is light to handle. Sorry, we failed to record your vote. Please try again Not anymore this is as good as it gets in its price range. Can't wait to try it out on the beach. Happy hunting. Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again Er kann locker mit dem Teknetics G2 mithalten. Ich gebe ihn nie wieder her. Wenn man denn Detektor bekommen hat bitte nicht in der Wohnung Anschalten er spielt sehr verrückt wegen dem ganzen Metallen. Sorry, we failed to record your vote. Please try again It works as expected. I use it a little bit at the beach. Seems to do what it says it does. Does not appear to be very sensitive. But the screen is nice and some useful information for beginner like me. I would recommend to buy a cheaper one if you are a beginner like me. Sorry, we failed to record your vote. Please try again Leider ist das wieder schlimmer geworden mit dem PinPointer., gerat geht zuruck, schade wirklich der Detektor war recht gut Sorry, we failed to record your vote. Please try again Quiero saber como calibrar el equipo, el manual que trae es muy la informacion.

Sorry, we failed to record your vote. Please try again How can I know if it's original or not

refurbished. I did a check on many unboxing on youtube and should come in the original box. Sorry, we failed to record your vote. Please try again Even when i change the sensitivity. Ive only used it once so i will keep working through the frustration. Sorry, we failed to record your vote. Please try again Was ich anfangs schade fand, war die Tatsache dass nur eine kopierte DIN A4 Seite in Deutsch als Bedienungsanleitung dabei ist. Natürlich aber auch eine komplette in Englisch, aber man fuchst sich auch so rein Sorry, we failed to record your vote. Please try again In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading. These short reference videos are intended to answer some of the most common questions that we encounter from our customers at Garrett. Here are a few proven remedies to some of these common symptoms. You can identify iron targets in an AllMetal Mode Increase the sensitivity on your detector and scan from different directions until the signal becomes more definite. In the case of multiple targets switch to the AllMetal Mode or press PINPOINT to precisely locate all targets. NOTE Iron targets may cause Intermittent Signals. You can identify iron targets in an AllMetal Mode. If you are hunting for coins, ensure you are in the COINS mode. You may also use the AllMetal mode, which detects all metal targets to ensure desired targets are present. Scan from different directions until your Target ID Cursor becomes more stable. It's impossible to predict with complete certainty how deep a specific detector can be expected to find metal. This is because there are a variety of factors that affect a detector's performance. For example, the amount of minerals in the soil, the type of metal that's being detected and the quality of the detector itself impact how deep your detector will hunt.

The size and surface area of a target also affects detection. For example, the larger a metal target, the easier and more deeply it can be detected. Slowly and methodically sweep your searchcoil from side to side, keeping it one to two inches above the surface. Overlap each sweep by advancing the searchcoil by about one quarter to one half of its diameter. Scanning in a straight line helps to keep the searchcoil level and the overlap sweeps uniformly while reducing the likelihood of lifting the searchcoil after each sweep. Listen for a peak in the audio sound. Hold the searchcoil one to two inches off the ground and slowly sweep it back and forth in an X pattern. Note where the sound becomes the loudest. The target should be located in the center of the imaginary X. Many of today's modern metal detectors are equipped with an electronic pinpoint button. Read your owner's manual for complete electronic pinpointing instructions. Alkalines are disposable batteries that last between 25 and 30 hours and cost about two dollars each. Because extreme temperatures can drain battery power, it is recommended that you always carry a spare set of batteries. In cold weather, attaching the battery pack to your belt under your jacket can help keep batteries warm and dry. Discrimination refers to a metal detector's ability to reject a target, such as a pull tab and foil or accept a target such as a coin or piece of jewelry based on its metallic composition. With features like Target Imaging and Tone ID, your detector can tell you what your target is before you ever dig. Multiple receivers, within a GTI metal detector, add additional dimensions of target ID, not just material ID. Ultimately, however, it's how multiple receivers relate to one another that provides these true measurements, not just merely having them.
